

TECHNICAL DIVISION EXPANSION CONTINUES AT SMART

Thanks to phenomenal and rapid success, Award winning Smart Group Recruitment Solutions has seen considerable expansion in its Technical Division which now employs 8 members of staff having started off with just 2.

Richard Grace, Technical Division Manager, who has an engineering background, says it is specialist engineering knowledge that has helped them to grow at such a significant rate.

"It makes such a big difference when you can speak to the clients in their language and truly appreciate the issues they need to solve. There is a substantial lack of skilled personnel in this sector and we now have a superb data base of talented individuals to enable us to match candidates to the roles required. We have a very high percentage of repeat business because we get the right person for the job at the first time of asking."

Smart Recruitment has a long established record of supplying staff in the South West Region but has recently expanded its reach across to the Eastern side.

"We are now undertaking business with Southampton based clients and beyond," added Richard. "I am confident we can continue to benefit clients through the expertise we have in this very specialist market."

Smart Recruitment is the current winner of the prestigious Dorset Business Awards 'Best Management Team' and recently received star status as a Top 100 Best Company to Work For.

Not only their bulging awards shelf but their pragmatic and enthusiastic approach to business means Smart Recruitment is well placed to advise on recruitment needs both strategically and geographically. Having recently opened an Exeter branch, Smart Recruitment in Exeter can be found at 1 Emperor Way, Exeter Business Park. The recent move sees the forward thinking company extending their presence along the south coast from an existing network of five high street branches which include Poole, Bournemouth, Christchurch, Dorchester and Yeovil.
